## Boulder Museum of Contemporary Art (BMoCA) Announces MediaLive: Technology as Healing

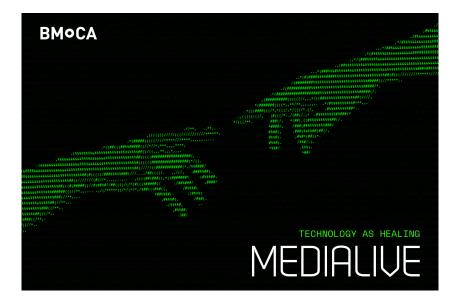

Technology as awareness, awareness as empathy, empathy as healing, healing as change.

### Fall Exhibition Opening Reception October 12, 6-9pm

**BOULDER, CO - October 2, 2023** – Boulder Museum of Contemporary Art is excited to bring another edition of *MediaLive* to Boulder. The exhibition will be on display from October 12, 2023 to January 14, 2024 at the flagship location.

From our earliest stone tools to the advent of AI, technology is a catalog of human innovation. *MediaLive: Technology as Healing* explores the synergies between art and technology as instruments of positive change for our collective future.

This exhibition features the work of 8 artists who explore different forms of technology as solution-based methods for grappling with the complex global challenges of our time. With a broad range of artistic mediums, *MediaLive* addresses issues of self-identity, biomaterials, shared digital spaces, sonic empathy, and obsolescence. Through their seemingly disparate practices, the artists reveal the undeniable possibilities of healing through technology. *MediaLive* presents various interpretations of how we can transform art practices into sustainable action.

#### About the Artists:

Working at the intersection of technology and art, **Mirela Alistar** (assistant professor, ATLAS Institute) is passionate about interfacing with living matter, specifically with the micro-organism part of our being and our environment. Her work is a continuous play with biology, engineering and art to explore the lost connection of humankind with all other kinds.

**Sophia Mehdizadeh,** with support from the Brain Music Lab, is a creative technologist, musician, and engineer. She has spent the past seven years designing and building experimental physical interfaces and installations for musical expression. Originally from Chicago, Illinois, Mehdizadeh is a PhD student in the Brain Music Lab at CU Boulder's ATLAS Institute.

**The Brain Music Lab** pursues research and develops creative practices to promote health and well-being by combining new music technologies with EEG (brainwave data) and other physiological measurement techniques.

Above: Ále Campos headshot, courtesy of the artist. Image by Eugene Tang.

**Ále Campos** is a multidisciplinary artist and performer whose elastic studio practice is anchored by drag and their persona, Celeste. Their performances, often mediated by technologies (cameras, green screens, live-streams, projections), test the directions of the gaze and the scales of hyper-visibility, stretching the boundaries of the stage.

**Eceertrey** is an AR/VR/Photographer from Denver, Colorado with a deep passion for nature and our environment. A self-taught artist, Eceetrey exports his imagination into VR/AR sculptures purposefully placed in outdoor environments to complement and showcase his distinctive artistic style.

**Thessia Machado** is a visual/sound artist, instrument builder and performer whose work plumbs the materiality of sound and its effect on our shifting perceptions of space. She creates circumstances in which to mine the matter of her pieces for their innate physical properties and the sonic and visual relationships that can arise from their interactions. In improvised and composed performed works, the ensemble of things is augmented by a dynamically responsive and intentionally unpredictable human element. Electronics are usually implicated.

**Cherish Marquez** is an interdisciplinary artist with a focus on digital media. Her work explores environmental justice, mysticism, mental health, queer identities, and healing from generational trauma. Her work operates from a queer Latinx perspective and is heavily subjected to speculative futurism.

**Raquel Meyers,** in partnership with Denver Digerati, works with obsolete technologies like the Commodore 64, Teletext, typewriters or fax machines mixed with photography, animation and embroidery, among other techniques. She defines her practice as KYBDslöjd [mecanografía expandida] whose significance can be defined roughly as <a manual skill with a keyboard>.

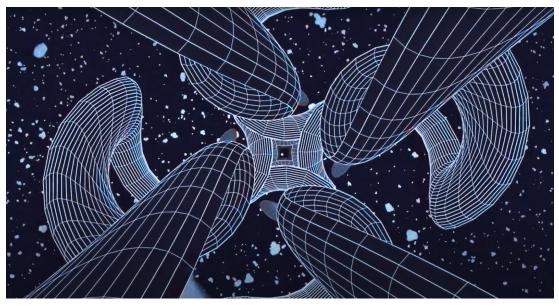

**Denver Digerati** is an innovative nonprofit organization dedicated to the support and amplification of digital motion art and animation. Artist-centered, Denver Digerati believes in the freedom to create without restrictions and endeavors to promote those fearless creators who aspire to express their unique visions through art. Their platform is focused on inclusivity and the next generation of digital interdisciplinarity. Denver Digerati hosts the annual Digerati Emergent Media Festival and is a key partner in MediaLive.

**Rory Scott** is a multidisciplinary artist, whose work utilizes animation, extended-reality (AR & VR) along with handcrafted means to create emotive environments & reimagined life. Through both digital and handmade means, Scott explores the ideas of impermanence, the passage of time and the impacts of technology upon the evolution of humanity.

#### MediaLive Events Schedule:

#### **Fall Exhibition Opening Reception**

Thursday October 12 5-6pm member preview 6-9pm free public reception The Opening Reception will have performances by Ále Campos, Thessia Machado, and Grace Leslie with Brain Music Lab.

ATLAS Institute at University of Colorado Boulder and Denver Digerati are key partners in the 2023 iteration of *MediaLive: Technology As Healing*.

#### About **BMoCA**

Boulder Museum of Contemporary Art (BMoCA) inspires creativity and fosters community through contemporary art. Since 1972 BMoCA has grown from an artist-founded arts center into a regional leader in amplifying artists and serving diverse communities. As a non-collecting museum, BMoCA annually serves 170,000+ people through 20+ exhibitions and 600+ programs at its flagship facility in Boulder, CO and 40+ partner locations across the Denver metro area. BMoCA supports artists through exhibitions, programs, commissions, and publications and features 250+ artists each year.

BMoCA is located at 1750 13<sup>th</sup> Street in downtown Boulder, Colorado. The museum is open 11am–5pm Tuesday–Sunday (Open at 9am on Saturdays & until 8pm on Wednesdays during Boulder Farmers Market). Starting on October 13, 2023, admission will be "Pay from Your Heart." <u>BMoCA.org</u> / 303.443.2122.
